

Sabin Chacko

Lead Software Engineer | Solutions Architect | Enterprise Systems Integration

sabinchacko03@gmail.com • +971 55 380 4693 • Abu Dhabi, UAE • linkedin.com/in/sabin-chacko • sabinchacko03.github.io

Summary

Lead Software Engineer and Solutions Architect with 13+ years designing and scaling high-availability enterprise platforms across the UAE. Expert in bi-directional integration hubs (SAP, Salesforce), resilient NestJS API gateways (idempotent ingestion, transactional outbox, queue-backed retry) and cloud-native delivery on Azure/AWS. Translate executive requirements from IT, Group Compliance and FP&A into C4 architectural blueprints; recent governance platforms returned AED 550K+ a year (2.7 FTEs) at 100% audit compliance.

Technical Skills

Backend: PHP 8.x, Laravel (Eloquent, Queues, Sanctum), NestJS/TypeScript (DTO, guards, interceptors, DI, Prisma), Yii2, Python (FastAPI)

Frontend: ReactJS, React Native, TailwindCSS, Vite, Alpine.js, Livewire

Enterprise Integration: SAP HANA, Salesforce API, REST/SOAP, OAuth2, Webhooks, Pathlock

Databases: MySQL, PostgreSQL, MS SQL Server, Redis

Cloud & DevOps: AWS (EC2/S3), Azure, Docker, Git, CI/CD, Jira, Agile/Scrum

Professional Experience

Ittihad International Investment

Abu Dhabi, UAE

Lead Software Engineer

02/2023 – Present

- **System Design & Team Leadership:** Led 3–4 engineers in Agile delivery of 12+ enterprise workflow automations on PHP (Laravel) and SQL Server, translating complex stakeholder requirements into production systems.
- **Enterprise Integration & API Gateway:** Architected a NestJS gateway for SAP PO/SO/PR approval automation (contract-first OpenAPI, idempotent ingestion, transactional outbox with dead-letter retry) and a bi-directional SAP/Salesforce hub.
- **Performance & Cloud Deployment:** Designed high-availability Azure environments with observability (logging, correlation IDs, Slack alerting); Dockerized services into air-gapped VMs behind nginx/Azure Application Gateway, decoupling background work via queues.
- **Business Impact:** Automated group-wide DOA policy matrices and vendor onboarding across multiple subsidiaries, saving AED 550K+ a year (2.7 FTEs) from the Business Partner module alone at 100% audit compliance.

Delivery Zone

Abu Dhabi, UAE

Lead Software Developer

07/2021 – 01/2023

- **Technical Leadership:** Directed a full-stack team architecting a high-traffic B2B logistics ecosystem using Laravel, Redis, MySQL and React Native, with CI/CD for zero-downtime deployments.
- **Real-time Operations:** Engineered a live tracking dashboard using Google Maps APIs, Firebase and Laravel Queues to optimize delivery routes via high-volume location data processing.
- **API Design & Integration:** Developed a secure PHP SOAP server for mission-critical Abu Dhabi Police app integration and managed scalable AWS and Etisalat VPC infrastructure.

Ducon Industries FZCO

Dubai, UAE

Lead Web Developer

04/2019 – 07/2021

- **eCommerce Migration:** Led eCommerce development using Laravel and React, migrating legacy Yii2 and Concrete5 systems to a modern full-stack architecture.
- **SEO & Performance:** Strategized website optimization and SEO analytics to drive user engagement and improve search rankings for high-traffic platforms.
- **Payments & CRM:** Integrated Salesforce and multiple payment gateways to secure transactions and streamline customer data across the eCommerce ecosystem.

Infinite Open Source Solutions

India

Team Leader

10/2017 – 02/2019

- **Team Leadership:** Directed the delivery lifecycle, mentoring developers on coding standards and testing protocols.
- **Client Management:** Owned client communication and used PM tools to set deadlines and delegate tasks.

Software Programmer, Braddock Infotech (2015–2017): Built PHP/Python socket applications for Telecom LCR systems.

Web Developer, Infinite Open Source Solutions (2013–2015): Promoted to Team Lead after delivering MLM applications.

Key Projects

Simplifi | Enterprise Workflow Automation Platform

Ittihad International Investment

- 12+ end-to-end workflow automations for 400+ users on PHP/Laravel and Python/FastAPI, with a custom SAP HANA connector and Salesforce/Pathlock APIs for real-time consistency and automated SoD compliance (88% effort reduction).

Wayno & Dispatcher | B2B Logistics and Delivery Platform

Delivery Zone

- eCommerce and last-mile delivery platform with a Google Maps tracking dashboard, REST/SOAP API ecosystem and a secure SOAP integration with the Abu Dhabi Police app, delivered on AWS (EC2/S3) and Etisalat VPC with CI/CD.

Education

Govt. Engineering College, Idukki

Kerala, India

B.Tech (Bachelor of Technology), Computer Science

2009 – 2013
